

Ajax Solitaire

Ok, so once in a while we should pay homage to the addictive 10 minute games, and in this news article we look at every companies worst enemy and every employees get away from hell game: Solitaire.

Browsing around the vast space of the Internet I stumbled across a web based version of Solitaire running on Ajax, which to be honest, I found pretty cool.

Anyway, sufficed to say its free and quick to load on broadband, so if you're in the mood for a game then give it a whirl.
